Re: 1/25/21 Reelfoot Lake Deaths

This office has received the forensic autopsy reports on the bodies of David Vowell, Chance Black and Zachary Grooms. The Black and Grooms findings were consistent with the statements taken from the survivor, Jeff Crabtree, in the manner and location of their fatal gunshot wounds.

The autopsy findings in David Vowell stated that the cause of death could not be conclusively determined, but "The circumstances surrounding his death and discovery suggest that he died as a result of either drowning or hypothermia (low body temperature)". This, too, is consistent with the statements taken from Crabtree.

This office finds no basis for criminal charges in this matter, but, as is the policy of this office, will report the findings to the June term of the Obion County Grand Jury.
